

1.2A DRV8833 Dual H-Bridge Motor Driver

This tiny breakout board for TI's DRV8833 dual motor driver can deliver 1.2A per channel continuously (2A peak) to a pair of DC motors. With an operating voltage range from 2.7V to 10.8V and built-in protection against reverse-voltage, under-voltage, over-current, and over-temperature, this driver is a great solution for powering small, low-voltage motors.

SKU: [DRV1016](#)

Brief Data:

- Dual-H-bridge motor driver: can drive two DC motors or one bipolar stepper motor.
- Operating voltage: 2.7~10.8Vdc.
- Output current: 1.2A continuous, (2A peak) per motor.
- Motor outputs can be paralleled to deliver 2.4A continuous (4A peak) to a single motor.
- Inputs are 3V & 5V compatible.
- Under-voltage lockout and protection against over-current and over-temperature.
- Reverse-voltage protection circuit.

Mechanical Dimension:

Unit: mm

The Face behind our product quality...

In a world of constant change and continuous technological development, a new or replacement product is never far away – and they all need to be tested.

Many vendors simply import and sell without checks and this cannot be the ultimate interests of anyone, particularly the customer. Every part sold on Handsontec is fully tested. So when buying from Handsontec products range, you can be confident you're getting outstanding quality and value.

We keep adding the new parts so that you can get rolling on your next project.
